

Use Cases

- 1) Log Into the Application
 - a. User page 1 will allow the user to log into the application. This will place a query against the user's database. The user's database will insure a true user via a user name and password. The user's table will also provide the user's bishop's id, which will determine the data viewed and stored through the rest of the application.
- 2) Bishop Log In
 - a. If a bishop logs into the application his main concern will be to view the interviews for the current day. Page seven will provide this functionality. In other words, if a bishop logs in on an interview day, he will be transferred to page 7, otherwise he will be transferred to page2.
- 3) Secretary Log In
 - a. If a secretary logs into the application his main job is to schedule appointments. Therefore, he will be taken to page2. Page two allows the secretary to view available times during the given month and to add and remove appointments. These appointments are stored in the appointments database. Pages 3 and 4 show more specifically the pages provided to add and remove appointments.
- 4) Set Days To Interview
 - a. Each bishop only has select days during the month in which he is available to perform interviews. Page 5 will allow the secretaries and the bishop to modify the days of the week that his available to perform interviews. Each day will be represented in the days table and will store with or not it is to be displayed on page 2.
- 5) Set Times for Each Day
 - a. Each bishop also needs to set the times during each day of the week that he is available to do interviews. Page 5 will allow the bishop and secretaries to modify the times he is available to interview each day. These times will be reflected in the time's table. Every time will be represented in the table.
 - b. Page 6 will allow a fine grained approach to modifying the times of each day that the bishop is available.
- 6) Add a User
 - a. An Existing user will also need the ability to add a new user and potentially a new bishop. This is accomplished by adding a record to the users table via page 8, with the appropriate role. If a new bishop is created then the appropriate entries are made in the times table.
